Product Overview

Professional Soil Preparation

The 1.7m Tractor Mounted Disc Harrow is an efficient implement designed to clean crop residues, break hardened soil, and level the land for optimal seedbed preparation. Featuring high-strength 65Mn spring steel discs and a durable bearing assembly, it is engineered for heavy clay, waste land, and weedy fields. The offset design allows for smooth soil surfaces and efficient power utilization across varied agricultural environments.

Technical Specifications

Core Performance Metrics

1700 mm

Working Width

120 mm

Working Depth

40 hp

Required Power

260 kg

Total Weight

Full Series Availability

Model	Width (mm)	Discs	Weight (kg)
1BQX-1.1	1100	12	200
1BQX-1.3	1300	14	220
1BQX-1.5	1500	16	240
1BQX-1.7	1700	18	260
1BQX-1.9	1900	20	310
1BQX-2.3	2300	24	360

Number of Discs	18
Linkage System	Three-point suspension II type
Blade Material	65Mn Spring Steel

Key Features

Equipment Highlights

- Adjustable working depth for versatile tillage
- Individual scrapers fitted to each disc blade for debris removal
- Robust and durable bearing assembly
- Suitable for heavy clay and waste land conditions
