Overview

Professional Tractor Mounted Disc Plough

This high-performance tractor-mounted disc plough is engineered for primary tillage operations, including breaking, turning, and mixing soil. Its revolving disc design ensures efficient furrowing, making it particularly effective in challenging conditions such as fields with weeds, stems, or abrasive soil. The robust, round-frame construction provides excellent durability, while the adjustable depth control allows for precision tillage tailored to your specific crop requirements.

Performance Features

Operational Advantages

- Anti-winding design prevents grass blockage
- Effective cutting of tough stems and roots
- Low working resistance for fuel efficiency
- Robust round frame construction
- Compatible with standard 4-wheel tractors

Technical Specifications

Mounting System	Three-point hitch, Tractor-mounted
Tractor Compatibility	Medium to large 4-wheel tractors
Disc Construction	Hardened steel independently rotating discs
