Product Overview

The precision planter unit mounted on a tractor, showing individual seed hoppers and robust construction for field operations.

Precision Corn Seeding Solution

This tractor-mounted precision corn seeder is engineered to deliver highly accurate single or double seed planting, significantly reducing seed waste. The unit performs multiple operations in a single pass, including furrowing, fertilizing, seeding, covering earth, and pressing. Designed for compatibility with four-wheel tractors ranging from 15-80hp, it provides a revolutionary approach to efficient corn cultivation.

Technical Specifications

Model Specifications

Model	Power (hp)	Weight (kg)
2BGYF-2	15	140
2BGYF-3	20	185
2BGYF-4	30	245
2BGYF-5	40	310
2BGYF-6	50	370
2BGYF-7	60	470

Key Operational Metrics

50 mm

Min Working Depth

100 mm

Max Working Depth

500 mm

Min Row Spacing

620 mm

Max Row Spacing

Features

Tractor Compatibility

15-80hp Tractors • Three-point suspension

Planting Options

Single seed precision, Double seed precision, Fertilizer application, Furrowing, Earth covering, Pressing
