Product Overview

Efficient Soil Cultivation

The 1BQX-1.7 tractor-mounted light duty disc harrow is engineered for effective soil preparation, including breaking hardened soil and managing crop residue. Constructed with high-quality 65Mn spring steel discs, it ensures durability and high performance in various field conditions. Its design allows for adjustable working depths and includes scrapers on each blade to maintain efficient operation even in weedy fields.

Compatibility and Design

- Matched power: 40 hp
- Three-point suspension: II type
- Blade material: 65Mn spring steel
- Integrated scraper for each disc
- Heavy-duty bearing assembly

Product Range

Series Model Comparison

Model	Width(mm)	Weight(kg)	Power(hp)
1BQX-1.1	1100	200	15
1BQX-1.3	1300	220	18
1BQX-1.5	1500	240	25
1BQX-1.7	1700	260	40
1BQX-1.9	1900	310	50
1BQX-2.3	2300	360	60

Compliance

Suitable Applications

Heavy clay soil, Waste land, Weedy field, Seedbed preparation, Crop residue management
