Product Overview

High-Efficiency Seeding and Fertilizing Solution

The 2BFG-100 is a versatile tractor-mounted seeder and fertilizer drill designed for precision farming. Compatible with walking tractors and power tillers, this implement supports simultaneous seeding and fertilizing across 6 rows, optimizing operational speed. Its robust design is ideal for sowing crops like rice, wheat, beans, and corn while ensuring consistent depth control for better yields.

Technical Specifications

Seeding Rows	6 rows
Fertilizing Rows	6 rows
Sowing Depth	40 mm
Fertilizing Depth	60 mm
Working Range	1000 mm

Performance Metrics

Work Efficiency

0.14 hm²/h

Average Efficiency

Compatibility

Compatible Power Units	Hand Tractor, Walking Tractor, Power Tiller
------------------------	---

General Data

Supported Crops

- Rice
- Wheat
- Beans
- Corn
