Product Overview

Robust Agricultural Grading Solution

This tractor-mounted scraper box is a heavy-duty implement engineered for efficient soil leveling, grading, and material transport. Constructed with reinforced steel and a reversible hardened cutting edge, it provides high durability for demanding landscaping and road maintenance tasks. The versatile design includes a standard three-point hitch for easy integration and adjustable scarifier teeth to prepare compacted ground effectively.

Key Features

Equipment Highlights

Three-point hitch system, Reversible cutting edge, Adjustable scarifier teeth, Heavy-duty steel construction
