

Tractor Needle Bearing 1000251M1

This needle bearing is designed for tractor applications. It features precision-engineered needle rollers for smooth and efficient operation.

Product Overview

High-Performance Tractor Needle Bearing

This needle bearing is precision-engineered for demanding agricultural machinery applications, including tractors and heavy-duty equipment. Designed to ensure optimal load distribution and reduced friction, it contributes to enhanced machine efficiency and extended service life. The robust construction provides reliable performance even in challenging operating environments.

Certifications & Standards

Compliance Standards

ISO/TS-16949:2009, ISO9001:2008

Technical Specifications

Supported Bearing Types

- HK
- HK..RS
- BK..RS
- DB
- NE
- Drawn cup needle bearing FY
- F HK....V
- B
- BH
- YB
- Drawn cup full complement needle roller bearing
- K
- KZK
- KBK
- K..ZW radial needle roller and cage assemble
- AXK
- AS
- LS thrust roller bearing and thrust washer
