Product Overview

Professional Tractor-Powered Snow Blower

This heavy-duty tractor-mounted snow blower is designed for efficient snow removal in both residential and agricultural settings. Powered by a PTO shaft, it offers versatile performance with a 360-degree rotating chute and adjustable height settings to protect delicate surfaces. Its robust construction ensures reliable operation even in harsh winter conditions, making it an essential implement for clearing driveways and paved areas.

Compatibility & Features

Back-mounted, PTO-Powered, 360-degree Pivot, Adjustable Skid Shoes

Performance Metrics

Operational Efficiency

150 m³/h
Max Capacity

15 m
Throwing Distance

540 r/min
Rotating Speed

Technical Specifications

Model	V138	PTO	18-45HP
Weight	250kg	Rotating speed	540r/min
Working width	138cm-168cm	Snow from	10-15m
Tractor driving speed	5km/h-10km/h	Impeller diameter	58cm
Blade quantity	3	Min distance from ground	1cm
Maximum work depth	50cm	Snow pivot angle	360°
Max capacities	130-150 m ³ /h	Constraint Type	Back mounted

A technical overview of the V138 snow blower attachment specifications.

Technical Data

Parameter	Value
Model	V138
Compatible Tractor Power	18-45 HP
Working Width	138 - 168 cm
Max Work Depth	50 cm
Weight	250 kg

Impeller Configuration

- Impeller diameter: 58 cm
- Blade quantity: 3
