

# Tractor PTO Water Pump for Irrigation

Tractor-driven water pump designed for agricultural drainage and irrigation. Powered by the tractor's PTO shaft, it provides a reliable and efficient solution for water transfer in fields and irrigation systems.

## Product Overview

### High-Efficiency Agricultural Water Management

This tractor-driven water pump is engineered for high-volume irrigation and agricultural drainage. Powered directly by the tractor's PTO shaft, it offers a mobile and reliable water transfer solution for demanding field environments. The unit features a durable, robust construction and mounts easily via a three-point hitch for rapid deployment.

## Technical Specifications

Drive Method	PTO (Power Take-Off)
Mounting Type	Three-point hitch

## Key Features

Primary Applications	Agricultural Irrigation, Drainage, Flood Control, Water Transfer
----------------------	--

## Performance Metrics

### Operational Performance
