

Tractor Transmission Gear TC432-26830 for Kubota L4708 L5018

This transmission gear is designed for Kubota tractor models L4708 and L5018. It serves as a replacement part within the tractor's transmission system.

Product Overview

Precision Transmission Component

This high-performance gear is specifically engineered for use in agricultural tractor transmission systems. Designed for durability, it ensures efficient power transfer and reliable operation even under demanding field conditions. The component is precision-manufactured to meet high industry standards, making it an ideal choice for maintenance and repair tasks to minimize downtime and restore optimal tractor functionality.

Compatibility

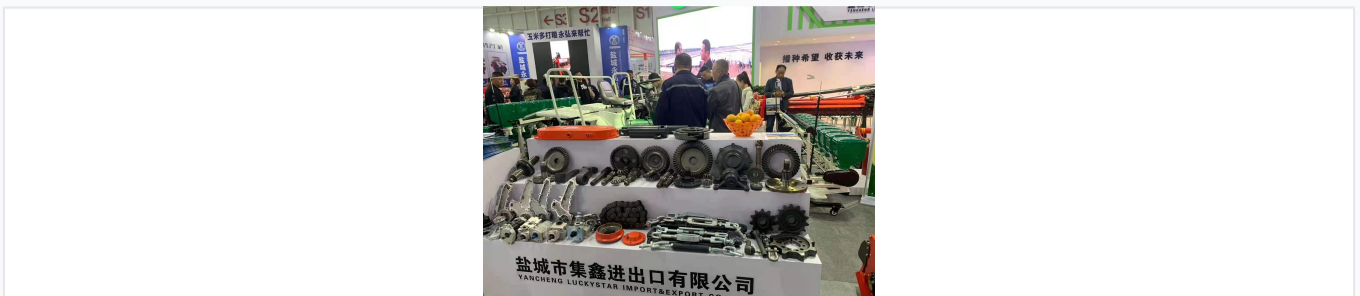

Transmission components compatible with agricultural machinery.

Compatible Tractor Models

L4708, L5018

Technical Details

Precision-engineered gear designed for heavy-duty transmission use.

Part Number	TC432-26830
Application Category	Tractor Transmission System
Component Type	Gear

Key Features

Performance Attributes

- Precision-cut teeth for efficient meshing
- High-strength material construction
- Reduced wear for extended lifespan
- Engineered for OEM-level performance
