

Tractor Truck for Hauling Applications

This is a tractor truck designed for hauling applications. It is equipped with a fifth-wheel coupling for connecting to trailers.

Product Overview

High-Performance Hauling Solution

This heavy-duty truck tractor is engineered for demanding hauling applications, featuring a sophisticated high-roof cabin design for driver comfort during long-haul operations. Its aerodynamic profile maximizes fuel efficiency, while the tandem rear axle configuration ensures superior traction and stability under heavy loads. Designed for versatility, the integrated fifth-wheel coupling makes this unit an ideal choice for a variety of trailer-based logistics tasks.

Technical Specifications

Axle Layout	Tandem rear axles
Design Highlights	High-roof cabin, Aerodynamic design, Tandem rear axles, Fifth-wheel coupling
Primary Application	Heavy-duty logistics and hauling
