Product Overview

Professional Traffic Calming Solution

This modular speed hump is engineered from a high-durability vulcanized rubber blend designed to control vehicle speed effectively in high-traffic areas. Its robust composition resists environmental degradation including UV rays, moisture, oil, and extreme temperatures without warping or cracking. Featuring a flexible design that conforms to uneven road surfaces, it ensures a long service life and reliable performance in parking lots and private roadways.

Technical Specifications

Available Section Lengths

- 250
- 500

Material

Vulcanized Rubber

Colors

Black, Yellow

Key Features

Material Properties

UV Resistant • Moisture Resistant • Oil Resistant • Anti-Warping • Weather Proof

Visibility Features

- Molded high-visibility yellow stripes
- Embedded glass reflectors
- Cat eye reflectors
