

# Traffic Cones for Road Safety

Durable traffic cones are designed for road safety and effective traffic management. These cones are made from high-quality, impact-resistant plastic, featuring a bright orange color and a reflective white band for enhanced visibility.

## Product Overview

### Professional Traffic Management Solutions

These durable traffic cones are engineered for high-visibility road safety and effective traffic management. Constructed from impact-resistant plastic, they are built to withstand demanding environments like construction zones and parking lots. The design prioritizes stability and visibility, ensuring reliable performance in various weather conditions.

## Technical Specifications

### Design Features

- Wide base for stability
- Impact-resistant construction
- Weather-resistant design

Material	Impact-resistant plastic
Visibility Features	High-visibility orange, Reflective white band

## Usage & Applications

### Recommended Applications

Construction Zones • Parking Lots • Temporary Traffic Control
