

Trailer Coupler Head for 50mm Draw Bars

This trailer coupler head is designed for use with 50mm draw bars, ensuring a secure and reliable connection between a trailer and a towing vehicle. Constructed from durable materials with a protective finish, it offers resistance to corrosion and wear.

Product Overview

Reliable Trailer Connection

The Trailer Coupler Head is engineered for secure and reliable towing, specifically designed to fit 50mm draw bars. This component ensures a stable connection between the trailer and the towing vehicle, prioritizing safety and performance. Built with durability in mind, it is an essential automotive accessory for various trailer applications requiring a compliant and robust solution.

Technical Specifications

Max Capacity

750 kg

Maximum Load

Compatibility

- 50mm diameter tow ball
- 50mm draw bars

Compliance & Standards

Certifications

ECE-R 55 Approved
