

Trailer Mounted Concrete Pump

This is a trailer-mounted concrete pump designed for efficient concrete delivery. It features a robust pumping system, a high-capacity hopper, and durable construction.

Product Overview

High-Performance Concrete Delivery

The HBTS90-21-200 is a high-performance trailer-mounted concrete pump engineered for efficient and reliable delivery on demanding construction sites. Featuring a robust pumping system and a high-capacity hopper, this equipment is designed to handle intensive concrete placement tasks with ease. Its durable construction ensures long-term operational reliability, while its mobile design offers the flexibility required for various project scales.

Technical Specifications

Model Number	HBTS90-21-200
Equipment Type	Trailer-Mounted, Concrete Pump, Construction Machinery

Key Features

Performance Metrics

90 m³/h

Theoretical Output

21 MPa

Maximum Pressure
