

Trailer Mounted Concrete Pump

Trailer-mounted concrete pump designed for efficient and reliable concrete placement on construction sites. It features a robust pumping system, hydraulic controls, and a durable chassis for easy transportation and operation.

Product Overview

High-Performance Concrete Pumping Solution

This trailer-mounted concrete pump is engineered for efficient and reliable concrete placement across diverse construction environments. Built with a robust pumping system and intuitive hydraulic controls, it offers consistent performance for building construction, large-scale infrastructure projects, and essential concrete repair work. Its durable chassis design ensures easy transportation and rapid setup on site, making it a dependable asset for professional contractors.

Technical Specifications

Model Identifier	HBT60C-1616DA
Equipment Type	Trailer Mounted Concrete Pump

Key Performance Metrics

Performance Highlights

60 m³/h

Max Theoretical Output

16 MPa

Max Concrete Pressure

Features

Key Features

- Robust pumping system
- Advanced hydraulic controls
- Durable chassis for mobility
- Suitable for infrastructure and building projects

Application

Suitable Applications	Building Construction, Infrastructure Projects, Concrete Repair
-----------------------	---
