

Trailer Mounted Welding Generator

This towable welding generator provides on-site power for industrial and construction applications. It features a heavy-duty engine enclosed in a protective housing and is mounted on a single-axle trailer.

Product Overview

Industrial Welding & Power Solution

This heavy-duty, trailer-mounted welding generator is engineered for demanding on-site applications. Designed for versatility and mobility, this unit combines robust power generation with reliable welding capabilities. It features a protective enclosure and a single-axle trailer base, ensuring it can be easily transported to various industrial or construction job sites.

Technical Specifications

Operational Stability

- Integrated support stands for operation
- Protective housing for engine
- On-site power generation capability

Recommended Use

Industrial • Construction • Field Welding

Equipment Type

Trailer Mounted Welding Generator

Mobility & Transport

Trailer Mounted, Single-Axle, Mobile
