

Trailer Positioning Dolly with Hand Crank

This heavy-duty trailer dolly is constructed from robust metal. It is equipped with a hand crank for smooth operation and easy maneuverability.

Product Overview

Professional Trailer Maneuvering

This trailer positioning dolly is engineered for heavy-duty performance, providing a reliable solution for trailer handling in industrial and agricultural settings. Featuring a robust metal construction and integrated hand crank, it ensures smooth operation and precise positioning. The design focuses on stability and durability, making it an essential tool for environments requiring frequent and efficient trailer management.

Technical Specifications
