

Trailer Wiring Cable for Electrical Connections

This trailer cable is designed for reliable electrical connections between a towing vehicle and a trailer. It features durable construction for long-lasting performance and resistance to environmental factors.

Product Overview

Professional Trailer Wiring Solution

This high-quality trailer wiring cable is designed to provide reliable electrical connections between towing vehicles and trailers. Engineered with durable, environmentally friendly PVC materials, it offers excellent resistance to aging and ensures consistent conductivity. The cable utilizes a specialized fused process to prevent wire end fraying and rust, promoting long-term performance for trailer lights and braking systems.

Technical Specifications

Material Characteristics

- Non-toxic PVC
- Tasteless compound
- Anti-aging formulation
- Environmentally friendly

Design Features

Round Wire, SP Linner Casing, Compression Resistant

Performance Metrics

Transmission Efficiency

100 %

Transmission Efficiency

Durability and Safety

Corrosion Resistant • Fused End Processing • High Conductivity
