Overview

Industrial Train Maintenance Solution

This high-performance maintenance platform is engineered for the specialized needs of high-speed rail and motor car servicing. Featuring a robust, multi-level steel structure, it provides secure and efficient access to various sections of rolling stock. Designed for professional industrial facilities, the system ensures worker safety through integrated railings and walkways while supporting heavy-duty, long-term operational reliability.

Technical Specifications

Safety & Access Features

- Integrated Railings
- Multi-level Walkways
- Support Columns
- Overhead Gantry Systems

Construction Material

Reinforced Steel

Compatible Vehicle Types

High-Speed Trains, Motor Cars

Operational Metrics

Operational Capacity

1 trains

Simultaneous Train Capacity

Facility Integration

Overhead Crane Compatible • Industrial Lighting Integrated
