

Transformer Welder for Arc Welding

This transformer welder is designed for various welding applications. It features adjustable settings for optimal welding performance and consistent results.

Product Overview

Professional Transformer Welding Solution

This transformer-based welding unit is engineered for versatile welding tasks ranging from automotive repair to general fabrication. Featuring a robust metal casing, it ensures durability and consistent performance in both professional workshop and DIY environments. Users benefit from precise control over current and voltage settings, supported by integrated thermal overload protection for safe operation.

Technical Specifications

Performance Metrics

100 A

MIG Welder Series

160 A

Max Output Capacity

Duty Cycle Capability

Yes

Supported Welding Modes

MIG, Arc Welding

Design & Build

Build Quality

- Robust metal casing
- Durable wire feed mechanism
- Thermal overload protection
- Compact form factor
