

Transit Bus IC Card Fare Collector

This electronic cash register is designed for fare collection in public transportation systems. It uses an integrated IC card reader, a digital display, and indicator lights.

Product Overview

Efficient Fare Collection Solution

The Transit Bus IC Card Fare Collector is a robust electronic cash register engineered specifically for public transportation environments. Featuring an integrated IC card reader and a clear digital display, it ensures rapid and reliable transaction processing for commuters. This device is built to withstand the demands of daily transit operations, providing essential operational status indicators for drivers and passengers alike.

Technical Specifications

Primary Application

Public Transportation • Transit Vehicles • Bus Systems

Model Number

GJ-200-9

Core Features

IC Card Reader, Digital Display, Operational Status Indicators, Electronic Cash Register
