

Translucent Blue Plastic Bottle for Liquid Dispensing

This bottle is made from durable, translucent blue plastic. It is designed for dispensing liquids with ease and control.

Product Overview

Designed for Precision Dispensing

This translucent blue plastic bottle is engineered specifically for liquid dispensing applications, particularly suitable for daily chemicals and cleaning solutions. The design prioritizes ease of use and controlled flow, ensuring product integrity and convenient application. With its durable construction, it provides a reliable packaging solution for various liquid products requiring strict viscosity control.

Physical Properties

Bottle Color	Translucent Blue
Material	Durable Plastic

Application

Performance Features

- Controlled flow mechanism
- Strict viscosity control compatibility
- High filling tightness
- Ergonomic dispensing design

Primary Application	Liquid Dispensing, Daily Chemicals, Cleaning Solutions
