

Translucent Blue Plastic Component Cover

This is a blue plastic cover used to protect components in electronic devices. It features a translucent material, curved shape, and a handle.

Product Overview

Professional Component Protection

This translucent blue plastic component cover is engineered to provide reliable protection for sensitive internal electronics, such as monitor components. Its robust design features a curved form factor with an integrated grip for convenient manual handling. Equipped with upper attachment points, it allows for seamless opening and closing while shielding equipment from dust, debris, and physical impacts.

Technical Details

Key Design Features

- Curved ergonomic shape
- Integrated handle grip
- Hinged mounting points
- Dust and debris shielding

Material Characteristics

Translucent, Plastic, Durable

Applications

Primary Applications

Monitor Components • Electronic Housing • Dust Protection
