

# Translucent CD Sleeves and Jewel Cases

These translucent sleeves and cases protect and store CDs. They offer a lightweight and space-saving alternative to traditional jewel cases.

## Product Overview

### Versatile Storage Solution

These translucent CD sleeves and jewel cases provide an efficient and lightweight method for protecting and organizing your media collection. Designed for both music and data storage, the semi-transparent material allows for quick identification of contents without needing to remove the disc. They serve as a space-saving alternative to bulky traditional cases, making them ideal for archiving large libraries of software, music, or digital data.

## Physical Characteristics

Available Colors	Yellow, Purple, Blue
Design Style	Translucent

## Usage & Application

### Primary Applications

- Music archiving
- Data storage
- Software organization
- Media protection

### Key Benefits

Space-saving • Lightweight • Easy identification
