

# Transparent Electric Kettle with Illuminated Indicator

This electric kettle features a transparent body to easily monitor water levels. It is equipped with a plastic handle and base, a spout, level markings, and an illuminated red light when in operation.

## Product Overview

### Transparent Electric Kettle

This electric kettle features a transparent body design, allowing users to easily monitor water levels through clear side markings. Engineered for efficiency, it is designed for rapid boiling, making it an ideal solution for both home and office environments. The unit includes a convenient illuminated indicator that glows red during operation, providing clear visual feedback.
