

Transparent Film Overwrapping Machine

This overwrapping machine wraps products in a transparent film for protection and enhanced presentation. It features automated feeding, film dispensing, and sealing mechanisms, accommodating various product sizes and film thicknesses.

Overview

Professional Overwrapping Solution

This three-dimensional transparent film packaging machine provides automated, high-quality overwrapping for a wide range of products. Using BOPP or PVC film, it creates a tight, tamper-evident seal similar to cigarette packaging, ensuring both aesthetic appeal and product protection. It is an ideal solution for businesses in the pharmaceutical, food, cosmetic, and stationery industries requiring reliable box-shape wrapping.

Technical Specifications

Production Capacity

20 bags/min

Max Throughput

Power Supply	220V / 50Hz AC
--------------	----------------

Power Rating	0.75 KW
--------------	---------

Compatibility

Application Areas

- Pharmaceuticals
- Food & Beverage
- Health Care Products
- Cosmetics
- Stationery
- CD/Media
- Tape
