

Transparent Film Overwrapping Machine

This high-speed, automatic packaging machine wraps products in transparent film. It creates a three-dimensional, tamper-evident seal, enhancing product presentation and protection.

Product Overview

Professional 3D Transparent Film Overwrapping

This high-precision overwrapping machine utilizes BOPP heat-sealing technology to create professional, three-dimensional box wraps. Designed for versatility, it is ideal for pharmaceuticals, cosmetics, food, and stationery items, offering both single-box and multi-pack capabilities. The unit includes an easy-unpacking feature and adjustable settings to ensure product integrity and aesthetic appeal for retail presentation.
