Overview

High-Performance Trapezoidal PC Chassis

This high-performance computer case features a unique, modern trapezoidal design with tempered glass panels, perfect for showcasing internal components and RGB lighting setups. Engineered for versatility, it supports a wide range of motherboard form factors and offers extensive cooling options, including liquid cooling compatibility. With a robust construction and optimized airflow, this chassis ensures durability and efficient thermal management for demanding builds.

Compatibility

Motherboard Support

ATX, Micro-ATX, Mini-ITX

Cooling & Airflow

Cooling System

- Multiple fan mounting locations
- Liquid cooling support
- Radiator mounting options
- Optimized airflow chassis design

Build & Design

Design Features

Trapezoidal Shape • Tempered Glass Panels • Cable Management Space

Connectivity

Front Panel I/O

- USB Ports
- Audio Jacks
