

Trawling Shackle for Marine Applications

This high-strength trawling shackle is designed for heavy-duty applications in marine and industrial environments. The shackle is made from durable steel and features a robust U-shaped body and a secure pin closure mechanism.

Product Overview

Heavy-Duty Marine Performance

This high-strength trawling shackle is engineered for demanding marine and industrial environments. It features a robust U-shaped body and a secure pin closure mechanism to ensure reliable performance during critical operations. Built for longevity, this component provides excellent corrosion resistance and strength for securing trawling gear and lifting heavy loads.

Technical Specifications

Material	Durable Steel
Design	U-shaped body with pin closure

Application & Features

Key Features

- High-strength construction
- Secure pin closure mechanism
- Corrosion resistant
- Suitable for heavy loads

Applications	Trawling Gear, Lifting Equipment, Marine Industry, Industrial Load Securing
