

Trench Type Material Mixer

The trench type mixer is designed for efficient mixing of materials. It features a stainless steel mixing chamber with internal blades, powered by a heavy-duty motor and equipped with pneumatic controls.

Overview

Industrial Trench Type Material Mixer

The trench type material mixer is a robust industrial solution engineered for consistent and thorough material blending. Constructed from durable stainless steel, this unit features a high-performance mixing chamber with heavy-duty internal blades. It is designed to enhance operational efficiency with integrated pneumatic controls and a streamlined discharge mechanism, making it an ideal choice for demanding industrial applications.

Construction & Design

Material	Stainless Steel
Mobility	Yes

Technical Features

Mixing Mechanism	Internal heavy-duty blades
Control System	Pneumatic controls
Discharge Mechanism	Automated discharge system

Compliance

Intended Applications

- Industrial blending
- Material mixing
