

Triangular Non-Stick Baking Mold

This triangular baking mold is crafted with fluted edges and a non-stick coating. It features a smaller triangular indentation in the center of its base for creating a specific shape or design in the baked product.

Product Overview

Professional Triangular Baking Mold

This high-quality triangular baking mold is designed for professional pastry and bakery applications. Featuring a durable non-stick coating and distinct fluted edges, it ensures easy release and consistent, aesthetically pleasing results for specialty cakes or pastries. The integrated center indentation allows for creative filling options or unique decorative designs, making it an essential tool for high-volume commercial kitchens.
