

# Triangular Toothed Metal Blade

This metal blade features a triangular design with sharp teeth on two edges, converging to a point. It is equipped with two mounting holes at the base for secure attachment to a tool.

## Product Overview

### Precision Cutting Performance

This triangular toothed metal blade is engineered for high-efficiency cutting and harvesting applications. Featuring a specialized design with closely spaced, sharp teeth along two converging edges, it ensures clean and consistent cuts. The robust metal construction and integrated mounting holes at the base allow for secure attachment to compatible tools, making it a reliable choice for professional equipment maintenance.

## Technical Specifications

Blade Shape	Triangular
Material	Metal
Mounting Type	Dual mounting holes
Edge Design	Triangular teeth, Dual-edge, Sharp
