

Tricycle Brake Cable Replacement

High-quality replacement brake cable designed for tricycles. This cable ensures reliable and smooth braking performance.

Product Overview

Reliable Braking Performance

This high-quality replacement brake cable is specifically engineered for tricycle applications. Designed for durability, the assembly features a flexible outer housing and a pre-lubricated inner wire to minimize friction and ensure smooth, responsive braking. It is built to withstand rigorous use and offers an easy installation process for standard tricycle brake systems.

Technical Features

Compatibility

Standard tricycle brake systems

Cable Construction

Flexible housing, Pre-lubricated wire, Wear-resistant, High-durability

Maintenance

Yes
