

Tricycle Tire - TH-608

The TH-608 tricycle tire is engineered for robust performance and durability on three-wheeled vehicles. Its tread pattern provides excellent grip and stability, ensuring safe operation in various conditions.

Product Overview

Built for Reliability and Performance

The TH-608 tricycle tire is engineered for robust performance and heavy-duty usage on three-wheeled vehicles. Its advanced tread design, featuring horizontal grooves, ensures superior traction and stability across various road conditions. Designed with a reinforced body structure, this tire excels at carrying heavy loads while offering excellent abrasion resistance for a long service life.

Technical Details

Tread Pattern	Horizontal groove pattern
Size	6.50-16

Performance Features

Road Suitability

- Commercial transportation
- Delivery vehicles
- General utility usage
- Various road surfaces

Key Features	High Load Capacity, Wear Resistant, Superior Traction, Reinforced Structure
