Overview

Professional Beverage Dispenser

This triple-bowl beverage dispenser is designed for high-efficiency commercial environments, including buffets, restaurants, and catering events. Featuring three independent transparent containers, it allows for the simultaneous serving of multiple chilled drink options. The unit incorporates a high-performance refrigeration system with an energy-efficient compressor, ensuring rapid cooling and temperature stability while maintaining a quiet operation profile.

Performance & Cooling

Operating Noise Level

65 dB

Maximum Noise

Key Cooling Technologies

- Surround-type stainless steel evaporator
- Fast refrigeration system
- Equilibrium temperature control
- Energy-efficient closed compressor

Design & Construction

Dispensing Mechanism

- Three independent bowls
- Individual dispensing taps
- Internal stirring mechanism to prevent settling
- Ventilation grills for heat dissipation

Build Materials

Stainless Steel, Transparent Polymer, Metal Casing

Applications

Ideal Environments

Buffets • Restaurants • Catering Events • Cafes
