

Triple Gang Champagne Aluminum Switch Frame

This triple switch frame is made from aluminum and has a champagne finish. It is designed to accommodate three standard-sized switch modules, allowing centralized control of multiple electrical circuits.

Product Overview

Elegant champagne aluminum finish for modern interior aesthetics.

Premium Aluminum Switch Frame

This triple gang switch frame features a high-quality aluminum construction with a refined champagne finish, offering both durability and a modern aesthetic. Designed for versatility, it supports flexible modular configurations to suit various electrical installation needs. Its robust build ensures a secure fit, providing a clean and professional finish suitable for both residential and commercial interior projects.

Installation and Compatibility

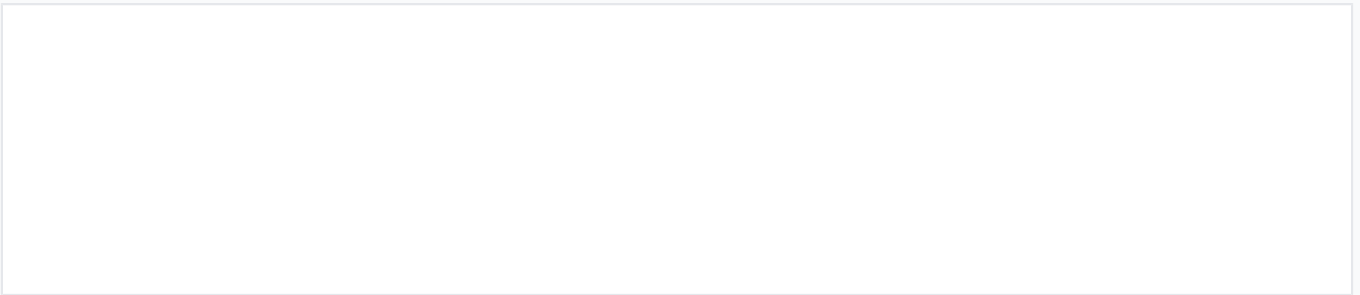

Flexible modular system allowing for easy configuration and inventory management.

Installation Features

- Universal orientation for horizontal and vertical mounting
- Notched pins for secure chassis attachment
- Designed for uneven wall surfaces
- Compatible with modular switch systems

Safety and Warranty

Technical features including fire-resistant materials and modular compatibility.

Safety Standards

Fire-resistant PC Housing • Child-proof Shutter • 850°C heat resistance • 3000V dielectric test

Warranty

Item Type	Warranty Period
Mechanical Switches/sockets	10 Years
Electronic Items	2 Years
