Product Overview

Triple Grouser Track Shoe

Engineered for excellence in construction, agriculture, and mining, these triple grouser track shoes provide a stable operating platform and superior maneuverability. The design includes integrated mud holes to prevent material packing in the chains, ensuring consistent performance. Fully hardened and tempered, these components meet the highest performance standards, delivering drastically reduced wear and extended service life in demanding environments.

Technical Specifications

Chain Pitch Range	228 mm
Quenching Treatment Hardness	HRC42-49
Core Hardness	HRC32 (at 13mm depth)
Painting Thickness	13 um

Features

Product Advantages

- Stable operating platform
- Improved maneuverability
- Optimal flotation and traction
- Integrated mud clearing holes
- Fully hardened and tempered steel
- Bespoke sizing available

Compatibility

Industry Applications	Construction, Agriculture, Mining
