

Triplex Mud Pump for Oilfield Drilling

This high-performance triplex mud pump is designed for demanding oilfield applications. The robust pump delivers consistent and reliable performance, ensuring efficient drilling operations.

Overview

High-Performance Triplex Mud Pump

This triplex mud pump is engineered specifically for demanding oilfield drilling applications, offering robust and consistent performance. Designed for durability, it features a heavy-duty power end and fluid end to ensure efficient operations in various drilling environments. The unit is optimized for ease of maintenance, making it a reliable choice for professional drilling projects.

Technical Specifications

Model Number	HX3NB-1300
Pump Type	Triplex Mud Pump

Key Features

Core Components

- Heavy-duty power end
- Heavy-duty fluid end
- Pulsation dampener

Design Attributes	High-performance, Durable, Easy maintenance, Oilfield-grade
