

# Triplex Mud Pump Liner

This mud pump liner is made of high-quality materials. It is designed to meet or exceed API-7K standards and is exchangeable with OEM products.

## Product Overview

### High-Performance Mud Pump Liners

These professional-grade triplex mud pump liners are engineered to withstand demanding drilling environments. Available in both bi-metal and ceramic zirconia configurations, the liners offer superior resistance to heat and corrosion. Designed for durability and precision, they are fully exchangeable with OEM components and meet or exceed strict API-7K industry standards.

## Technical Specifications

### Available Materials

- Bi-metal
- Ceramic Zirconia

### Construction Details

- High strength alloy steel outer hull
- Ceramic inner sleeve for zirconia models

### Compliance Standards

API-7K

## Performance Features

### Key Benefits

Heat Resistant • Corrosion Resistant • OEM Exchangeable

### Model Identifier

7K-0448
