

Triplex Well Service Mud Pump

This triplex mud pump is designed for well service applications. It features adjustable flow rates and high pressure capabilities.

Product Overview

High-Performance Triplex Mud Pump

The Triplex Well Service Mud Pump is a heavy-duty, high-performance solution engineered for demanding applications in the oil and gas industry. Designed for reliability in harsh environments, it features a robust construction suitable for pumping drilling mud, completion fluids, and well service chemicals. The triplex design ensures smooth, efficient fluid delivery, making it an ideal choice for well servicing and drilling operations.

Technical Specifications

Model Number	HM446
Pump Configuration	Triplex

Compliance & Quality

Compatibility	OEM Interchangeable
Industry Certifications	API 7K, ISO 9001:2008
