Product Overview

High-Performance Expansion Valve

This expansion valve is engineered for automotive air conditioning systems, specifically designed for truck applications. It regulates the flow of refrigerant into the evaporator to optimize cooling performance and ensure consistent cabin comfort. Built with durable materials and tested for rigorous performance standards, this component is a reliable solution for aftermarket service and direct replacement needs.

Technical Specifications

Precision-engineered expansion valve designed for heavy-duty truck air conditioning systems.

Refrigerating Capacity

4.2 kw

Refrigerating Capacity

Main Material	Aluminum
Pressure Tolerance	2.21 MPa
Bursting Pressure	3.33 MPa

Compatibility & Dimensions

Compatible Car Model	Shandong Wuzheng Altria T1
Size	345 x 245 x 159 mm

Quality Assurance

Quality Control

100% Tested

Service Capabilities

- OEM Service Available
- Custom Mold & Gauge Development
- Sample Availability
