

Truck and Bus Combination Switch

Combination switch assembly designed for truck and bus applications. This unit integrates multiple functions including turn signals, windshield wipers, and lighting controls into a single, consolidated module.

Product Overview

Robust Combination Switch Module

This high-performance combination switch is engineered specifically for the demanding requirements of truck and bus environments. It seamlessly integrates turn signals, windshield wipers, and lighting controls into one consolidated unit, streamlining vehicle cockpit controls. Built for durability and reliability, it meets or exceeds OEM specifications to ensure a perfect fit and dependable operation.

Technical Specifications

Integrated Functions

- Turn Signal Control
- Windshield Wiper Control
- Lighting Control

Application Compatibility

Truck, Bus, Commercial Vehicle

Installation Design

Clearly labeled electrical connections for standard automotive wiring system compatibility

Compliance

Quality Standard

OEM Specification Compliant
