

Truck and Bus Tire

This heavy-duty tire provides excellent handling and delivers good mileage for trucks and buses. Its robust construction ensures durability and reliable performance under demanding conditions.

Product Overview

Heavy-Duty Truck & Bus Tire

This premium heavy-duty tire is engineered for both long-haul and regional applications, prioritizing stability and durability. Featuring a robust four-belt construction and reinforced sidewalls, it provides superior load-bearing capacity and protection against curb damage. The specialized rubber compound and optimized tread design ensure exceptional wear resistance, mileage, and reliable handling in various dry and wet conditions.

Technical Specifications

- Improved 4 belts construction
- Improved tread toughness
- Excellent handling and retreadability
- Optimized casing package
- Increasing casing toughness
- Retreadability
- Sidewall reinforced
- Prevent curb scratch to protect casing
- Safety and retreadability

Internal 4-belt structure and reinforced sidewall design for enhanced durability and retreadability.

Size	275/70R22.5
Load Index	148/145M
Ply Rating	16 PR
Max Load (Single)	2900 kg
Max Load (Dual)	2725 kg
Max Inflation Pressure	830 kPa
Type	Tubeless, Retreadable

Key Features

Features & Benefits

- Enhanced tread compound
- High scrub resistance under urban operation
- Wear performance and mileage

- 4 strong ribs design with sipes
- Good wear performance for cornering and handling under dry/wet condition
- Handling and safety

Optimized tread pattern for improved cornering, handling, and scrub resistance.

Performance Highlights

- Improved 4-belt construction
- Enhanced tread compound for high mileage
- High scrub resistance for urban operations
- Reinforced sidewalls to prevent curb damage
- Optimized casing design for superior retreadability
