

# Truck and Bus Tire Changer

This tire changer is designed for removing and installing tires on trucks and buses. It features a pneumatic clamping system and bead breaker for simplified operation.

## Overview

### Professional Tire Solutions

The Sunrise SR 112 is a professional-grade tire changer engineered specifically for truck and bus applications. Built for efficiency and safety, this machine features a robust construction and a high-performance motor to handle heavy-duty maintenance demands. Its integrated pneumatic systems simplify the removal and installation process, making it an essential asset for tire shops, garages, and large-scale fleet maintenance facilities.
