

Truck and Bus Tire for Commercial Vehicles

This truck and bus tire provides excellent wear and a comfortable driving experience with low noise. It is designed to offer reliable performance for commercial vehicles.

Product Overview

Designed for Commercial Excellence

This commercial truck and bus tire is engineered to provide an excellent wear rate, low noise levels, and a comfortable driving experience. Its robust construction is optimized for demanding commercial applications, ensuring long-lasting tread life and superior grip across various road conditions. The innovative design focuses on safety, fuel efficiency, and performance reliability.

Key Features & Benefits

Features & Benefits

- Innovative tread compound
- Reduce rolling resistance
- Fuel saving

- Stone ejector under center grooves
- Prevent stone pinching
- Safety and mileage

Innovative tread compound design focused on reducing rolling resistance and fuel consumption.

Performance Features

- Innovative tread compound for reduced rolling resistance
- Improved fuel efficiency
- Stone ejectors to prevent stone pinching
- Steel blade tread design for enhanced grip
- Optimized pitch sequence to minimize road noise
- Biting edges for improved traction

Safety & Design

- Steel blade tread design
- Optimized pitch sequence
- Provide more biting edges
- Reduce noise
- Excellent handling and braking in wet condition
- Comfortable driving experience
- Four main grooves with variable angle wall design
- Effective water evasion and stone ejection
- Safety and mileage

Technical design details for enhanced grip and wet-condition safety.

Engineering Specifications

- Four main grooves with variable angle wall design
- Effective water evasion capability
- Enhanced handling and braking in wet conditions
- Stone ejection mechanism for extended mileage
