

Truck and Bus Tire

This tire improves grip and control, especially in winter conditions, by creating greater traction. It also provides a larger contact space with the road surface.

Product Overview

Winter Performance Excellence

This heavy-duty truck and bus tire is engineered with a specialized winter compound and a large block tread design to ensure reliable traction in harsh conditions. The open shoulder construction and integrated sipes provide superior grip and control for safer driving and handling on diverse road surfaces. Featuring a wide tread design, the tire maximizes contact surface area to enhance stability, efficiency, and overall performance for commercial vehicles.

Technical Specifications

Tire Size	12R22.5
Ply Rating	16PR
Load Index	156/150
Speed Rating	L

Performance Metrics

Maximum Load Capacity

2750 kg
Max Load

Maximum Pressure

830 kPa
Max Pressure

Design Features

Core Technologies	Winter Compound, Big Block Design, Open Shoulder, Deep Siping, Wide Tread
