

# Truck and Bus Winter Tire

This tire utilizes a special compound and pattern designed for safe driving on snow surfaces. Connection bars between blocks create stiffness and provide great grip.

## Product Overview

### Premium Winter Performance for Commercial Vehicles

This heavy-duty tire is specifically engineered for trucks and buses operating in challenging winter conditions. Featuring a specialized rubber compound and an advanced tread pattern, it provides superior grip, improved traction, and reliable vehicle control on snow-covered surfaces. Designed for safety and longevity, the tire incorporates structural enhancements to ensure stability during demanding commercial use.

## Technical Features

- Connection bars between blocks
- Create block stiffness
- Great grip for safe driving

Connection bars between tread blocks provide necessary stiffness and superior grip.

Features & Benefits

- Winter compound application
- Improve grip and control in winter
- Safety

- Block ribs with open shoulder and sipes
- Create traction and grip on road
- Good control for safe driving

Winter compound and open shoulder design optimized for traction in cold climates.

### Tread Technology

- Winter compound application for enhanced grip
- Block ribs with open shoulder design
- Integrated sipes for improved traction
- Connection bars between blocks for stiffness

### Key Performance Attributes

Snow Traction, Winter Grip, Enhanced Stability, Block Stiffness, Commercial Grade
