

# Truck Mounted Aerial Work Platform

This truck-mounted aerial work platform is a reliable solution for elevated work. The aerial lift mechanism provides a safe and efficient way to access elevated areas, with a maximum working height of approximately 15 meters.

## Overview

### High-Reach Aerial Solution

This telescopic boom aerial work platform offers a significant 30-meter working height, making it an ideal choice for complex elevated tasks such as building maintenance, street light servicing, and tree trimming. Engineered for safety and efficiency, the unit features a 200 kg bucket capacity with full 360-degree rotation for precise positioning. The robust chassis and high-performance engine ensure reliability and maneuverability in demanding professional environments.

## Engine & Drivetrain

### Engine Specifications

Feature	Specification
Engine Model	4HK1-TC51
Power Output	140 kW (190 hp)
Displacement	5190 ml
Emission Standard	China 5

Transmission	Manual, 6-speed forward, 1 reverse
--------------	------------------------------------

## Cabin & Comfort

Cabin Amenities	Single row, 3 seats, Air conditioner, Power steering, Central lock, Electrical glass lifter
-----------------	---

## Safety & Chassis

Brake System	Air brake
Total Weight	9000 kg
