

# Truck Mounted Boom Lift

This heavy-duty truck-mounted boom lift is designed for high-reach applications. It features a telescopic boom system with multiple extension stages, providing extensive vertical and horizontal reach.

## Overview

### High-Reach Versatility

This heavy-duty truck-mounted boom lift is engineered for demanding high-reach applications in construction, maintenance, and industrial environments. It features a sophisticated telescopic boom system with multiple extension stages, ensuring both extensive vertical height and horizontal reach. Designed for safety and stability, the unit includes integrated outriggers and a spacious work platform capable of accommodating operators and necessary equipment.

## Key Features

### Safety & Stability

- Integrated outrigger system
- Reinforced work platform
- Telescopic boom stability

### Suitable Applications

Construction, Industrial Maintenance, High-Reach Access

## Technical Specifications

### Platform Status

Spacious Design • Operator-Ready

### Boom Configuration

Telescopic with multiple extension stages
